Lighting Revolution provides a vapour proof fitting already pre-wired for T8 LED tubes. This cost effective solution allows customers to design and supply their own LED tubes for their projects - controlling both cost and wattage. The fixture is provided with Polycarbonate cover, stainless steel clips and a range of accessories to ease installation. Input power can be from either side or drilled through the top. Internally, the fixture is designed with 2 fast-connectors over insulation pads allowing easy connection irrespective of positioning.

PACKAGING: Covered with plastic and supplied in a carton.

INSTALLING: Direct connection according to tube specifications

WARRANTY: 2-year manufacturing warranty.

Installation to be done by a qualified electrician - unqualified installation could result in the warranty being voided. Please contact Lighting Revolution for further explanation on these guidelines.

PRICE: Please contact Lighting Revolution for an official quotation.
